http://bitnami.com/stack/drupal

The screenshot shows a web browser window with the address bar displaying <https://bitnami.com/stack/drupal>. The Bitnami logo is in the top left, and navigation links for Applications, Cloud, Support, What is Bitnami?, Log out, Console, and My Account are in the top right. Below the navigation bar, a breadcrumb trail shows: Drupal > Overview > Reviews > Installers > Virtual Machines > Cloud. The main content area features the Drupal logo and name, the URL drupal.org, and social media sharing buttons for Subscribe, Like (16), Tweet (36), and +1 (12). A paragraph describes the Bitnami Drupal Stack as a one-click install solution. To the right, there are two prominent green buttons: 'INSTALLER' for Drupal v7.27 for Linux 64-bit and 'VIRTUAL MACHINE' for Drupal on VMware. Both buttons include links to view operating system and download options. A black button for 'Download on the Mac App Store' is also visible.

Bitnami Drupal Stack provides a one-click install solution for Drupal. Download [installers](#) and [virtual machines](#) or run your own Drupal server in the cloud.

Drupal is a content management platform that allows users to easily publish, manage, and organize a wide variety of content on a website. It is used for community web portals, discussion sites, corporate web sites, intranet applications and many other sites. Drupal is easy to extend by plugging in freely available modules.

Instalando Bitnami Drupal 8

[illegible]

Bitnami Drupal 8: Máquina Virtual

- SSH deshabilitado por defecto

```
$ mv /etc/init/ssh.conf.back /etc/init/ssh.conf
```

```
$ sudo start ssh
```

- Usuario “bitnami” y password “bitnami”
- Todos los ficheros en /opt/bitnami

Más de 80 Aplicaciones en Bitnami

Supported Platforms

vmware

Windows Azure

SAVVIS

Bitnami Drupal 8: Componentes

- **Drupal 8 CMS**
- **Apache web server**
- **MySQL database**
- **PHP scripting language**
- **phpMyAdmin web application**
- **PHP extensions for Drupal: gd, mbstrings, uploadprogress**
- **Otras extensiones: APC, Mongo, OAuth, Solr entre otras**
- **Drush command line tool for Drupal**
- **Git distributed version control**

Bitnami Drupal 8: Estructura

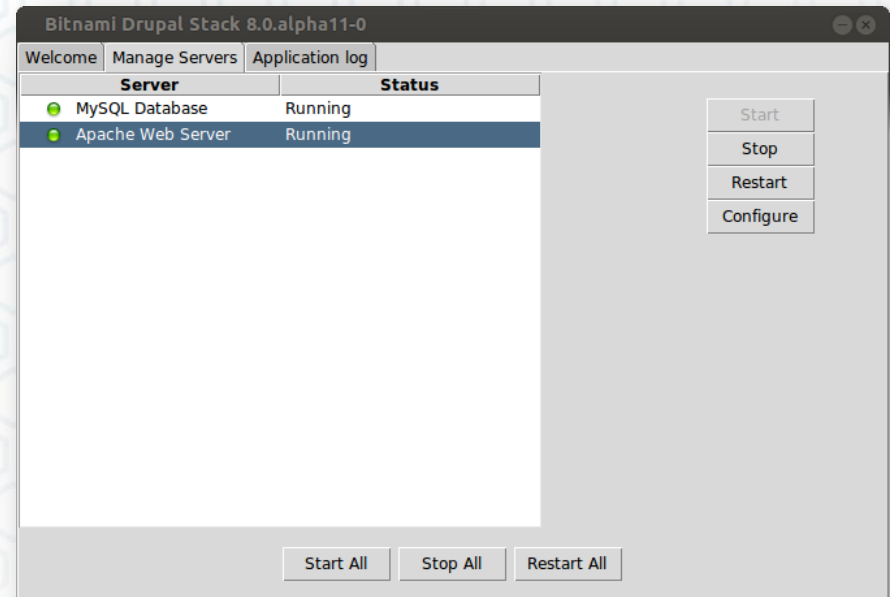

- Instalación autocontenida: todo en un directorio
- Independiente del sistema
- Incluye todas las librerías y dependencias
- Fácil de gestionar:

\$ ctlscript.sh start|stop|status

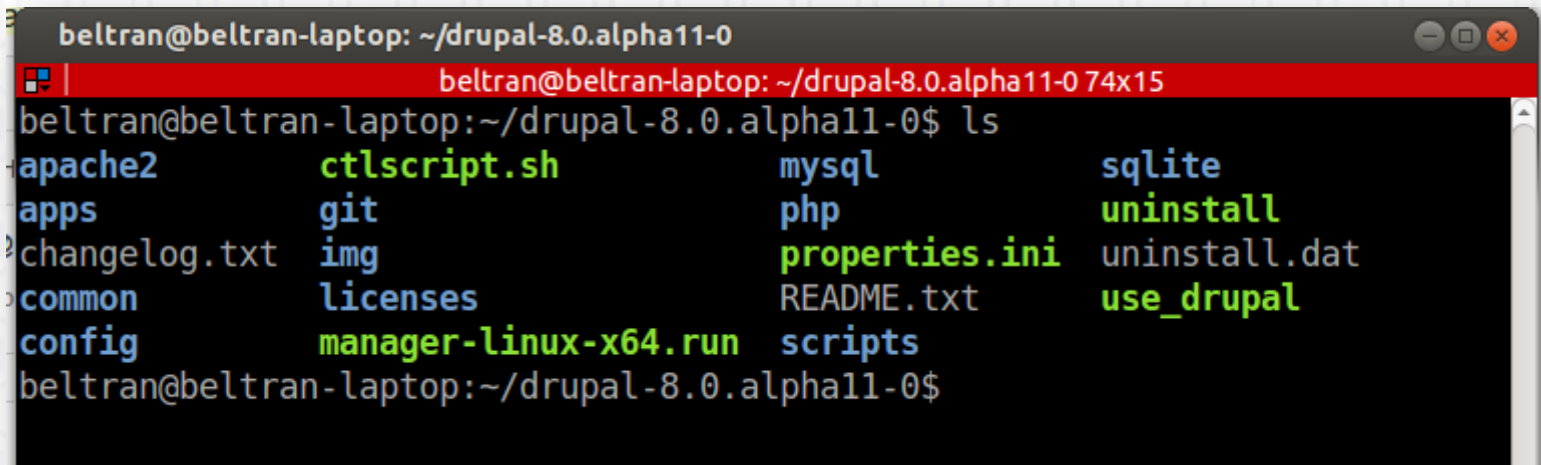

apache already running

mysql already running

php-fpm already running

Bitnami Drupal 8: Estructura

```
beltran@beltran-laptop: ~/drupal-8.0.alpha11-0
beltran@beltran-laptop: ~/drupal-8.0.alpha11-0$ ls
apache2      ctlscrip.sh  mysql        sqlite
apps         git          php          uninstall
changelog.txt img          properties.ini uninstall.dat
common       licenses    README.txt  use_drupal
config       manager-linux-x64.run scripts
beltran@beltran-laptop: ~/drupal-8.0.alpha11-0$
```

- **apps/drupal/conf** Apache configuration files
- **apps/drupal/htdocs** Drupal files

Bitnami Drupal 8: Línea de comandos

- **Linux y OS X**

\$ cd directorio_de_instalación (/home/beltran/drupal-8.0.alpha11)

\$./use_drupal (consola para cargar el entorno de la stack)

- **Windows**

Start -> Program Files -> Bitnami Drupal -> Use Drupal

- **Entorno de la stack**

\$ which php

/home/beltran/drupal-8.0.alpha11/php/bin/php

Bitnami Drupal 8: Línea de comandos

- **Drupal 8: GIT**

\$ git status

HEAD detached at 8.0-alpha11

- **Actualizar Drupal 8 al último cambio**

\$ git checkout 8.x

\$ git pull

Bitnami Drupal 8: Línea de comandos

- **Obtener los últimos cambios en el repo.**

```
$ git fetch origin
```

- **Resetear la rama actual.**

```
$ git reset --hard origin/8.x
```

- **Crear una rama nueva.**

```
$ git checkout -t -b patch
```

Bitnami Drupal 8: Línea de comandos

- **Descargar el parche.**

```
$ wget http://url_to_file.patch
```

- **Aplicar parche.**

```
$ git apply -v file.patch
```

- **Commitear los cambios del parche.**

```
$ git add <fichero/s modificado/s>
```

```
$ git commit -m"Patch applied."
```

Bitnami Drupal 8: Línea de comandos

- **Crear una rama nueva con los cambios del parche.**

```
$ git checkout -t -b interdiff
```

- **Modificar los ficheros necesarios.**
- **Crear parche.**

```
$ git diff origin/8.x > your_awesome.patch
```

- **Crear interdiff.**

```
$ git diff patch > interdiff.txt
```

Bitnami Drupal 8: Drush

- **Obtener información del sitio**

```
$ drush status
```

- **Instalar Drupal.**

```
$ drush si --db-url=mysql://root:root@localhost/drupal8 --account-name=rteijeiro --account-pass=password --clean-url --site-name="Drupal 8" -y
```

- **Reconstruir sitio Drupal y borrar cache.**

```
$ drush cr
```

Bitnami Drupal 8: Drush

- **Descargar módulo**

```
$ drush dl <module_name>
```

- **Habilitar módulo.**

```
$ drush en <module_name>
```

- **Deshabilitar módulo.**

```
$ drush dis <module_name>
```

Drupal 8.0.alpha11-0-dev (Ubuntu 12.10)

★★★★★

0 comments

Drupal powered by Bitnami is a pre-configured, ready to run image for running Drupal on Microsoft Azure. Drupal is a content management platform that allows users to easily publish, manage, and organize a wide variety of content on a website. It is used for community web portals, discussion sites, corporate web sites, Intranet applications and many other sites. Drupal is easy to extend by plugging in freely available modules. For more information on the Bitnami Drupal visit our website (<https://bitnami.com/stack/drupal>), wiki (<http://wiki.bitnami.com>) and forums (<http://community.bitnami.com>). Default credentials are username: 'user' / password: 'bitnami'.

Bitnami Drupal 8

Bitnami Drupal 8: Mejoras en rendimiento

- **Apache modo “event”**
 - Permite servir más “requests” simultáneamente
 - Funcionamiento similar a Nginx
- **PHP-FPM**
 - PHP FastCGI Process Manager
- **Google PageSpeed**
 - Compresión de imágenes
 - Compilación de javascripts y css
 - Caché

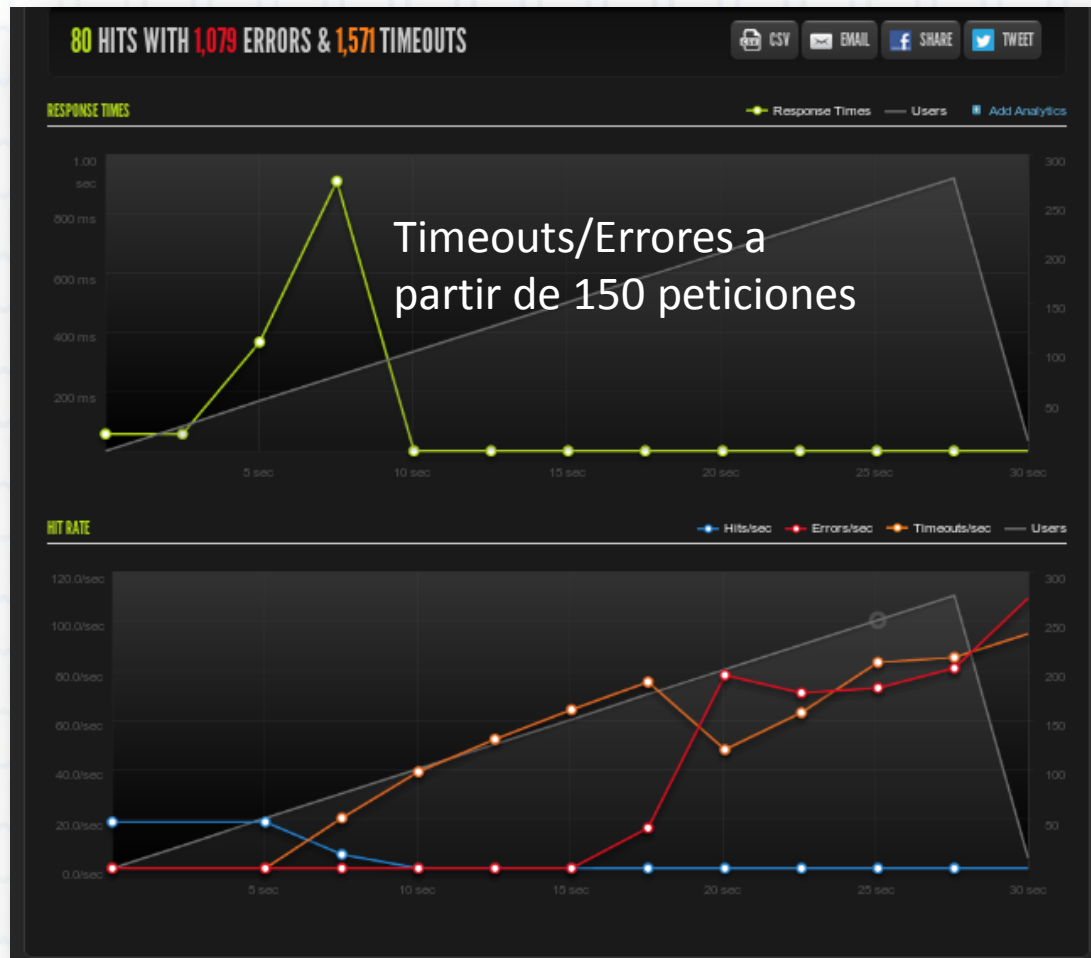

Bitnami Drupal 8: Mejoras en rendimiento

- **Configuración según instancia**
 - Apache, PHP, MySQL se adaptan a los recursos de la instancia
- **Varnish Cache**
 - Permite mayor número de usuarios
 - Reduce significativamente la carga de PHP y MySQL
 - Fácil de configurar
- **Monit**
 - Monitoriza y reinicia automáticamente los servidores

Bitnami Drupal 8: Apache “prefork” + mod_php

Bitnami Drupal 8: Apache “event” + PHP-FPM

Bitnami Drupal 8: Apache “event” + PHP-FPM + Varnish

Bitnami Drupal 8

- **Fácil de usar y ahorro de tiempo**
- **Últimas versiones de Drupal y sus componentes**
- **Múltiples plataformas**
- **Copias de seguridad, copias para desarrollo**
- **Escalar el servidor de forma sencilla**
- **Mejoras en rendimiento**
- **Monitorización de servidores y alertas**
- **Control completo del servidor**
- **Documentación**
- **Soporte <http://community.bitnami.com>**

Gracias
